SUMMARY

Full Stack JavaScript Developer with 3+ years of experience building scalable web, backend, and mobile applications. Currently at Utimez Technology, working on backend architecture and MongoDB schema design for Coinpedia — a global crypto and Web3 platform — while also developing cross-platform mobile features with Ionic React and Next.js frontends for subdomains and admin panel Coinpedia. Previously at Mantiqh Technologies, delivered 12+ client projects spanning PropTech, sustainability, and hiring platforms. Strong fundamentals in system design, performance optimisation, and SEO, with hands-on experience integrating AI pipelines using ChatGPT API for content automation and developer workflow improvement.

SKILLS

Frontend Development JavaScript, TypeScript, HTML5, CSS3, SCSS, React.js, Next.js, Gatsby.js, Ionic React, Tailwind CSS, Bootstrap, Material-UI, Ant Design, Styled Components

Backend & Databases Next.js API Routes, Node.js, Express.js, PHP, MongoDB, MySQL, SQL, BigQuery

Mobile Development Ionic React, Android Studio, Xcode

AI-Assisted Development ChatGPT API, AI content pipelines, social media automation, language conversion, PRD & task generation

DevOps & Testing Jest, React Testing Library, Cypress, Git, Chrome DevTools, Bash, Google Analytics 4, BigQuery, Matomo

EXPERIENCE

FULL STACK DEVELOPER

Sep '24 — Present
Hubballi, India

Utimez TECHNOLOGY

- Lead backend development using Next.js API routes and MongoDB, owning schema design and architecture across Jobs, Meetings, Academy, Users, Companies, Events, and Crypto Currency modules
- Built and maintain the Coinpedia cross-platform mobile app using Ionic React with native Android and iOS deployment, achieving 99.5% code reuse across platforms
- Develop Next.js frontend features for app.coinpedia.org and events.coinpedia.org, delivering responsive, SEO-optimised interfaces for a global crypto and Web3 audience
- Implemented server-side analytics using Next.js Server Actions and Google Analytics 4, reducing client-side overhead by 60%
- Built AI-powered pipelines using ChatGPT API for social media post generation, multilingual language conversion, and automated PRD and developer task creation, reducing overhead by 70%+
- Leverage AI tools throughout development to accelerate delivery while maintaining strong fundamentals in code quality and system design

FRONT-END DEVELOPER

Jul '22 — Sep '24
Belgaum, India

Mantiqh Technologies

- Spearheaded development of 12+ complex web applications, reducing page load times by 40% through optimization techniques
- Mentored 5 junior developers, implementing code review processes that decreased production bugs by 35%
- Increased mobile traffic by 50% by implementing responsive design principles across all client projects
- Improved search rankings by 30% for key clients through integration of SEO best practices in development workflows
- Reduced deployment time by 60% through automation of build processes and implementation of CI/CD pipelines

CAREER PROGRESSION

FEATURED PROJECTS

COINPEDIA PLATFORM, Utimez Technology [Link](#)

2024 — Present

- app.coinpedia.org
- events.coinpedia.org
- Led full backend restructuring of MongoDB schemas across Jobs, Meetings, Academy, Users, Companies, Events, and Crypto Currency modules, improving data consistency and API performance at scale
- Architected and developed a cross-platform crypto news mobile app using Ionic React with deep linking, push notifications (35% above industry open rate), and offline PDF reading

- Built Next.js frontend for app.coinpedia.org covering company listings, portfolio tracking, community, and academy features; and events.coinpedia.org with event discovery, speaker/organiser profiles, and filtering by location, date, and category
- Engineered server-side analytics with Next.js Server Actions, Google Analytics 4, and BigQuery, tracking user geography, platform usage, and content engagement with 60% less client-side overhead
- Built AI-powered pipelines using ChatGPT API for automated social media post generation, multilingual content conversion, and PRD and UI/developer task creation
- Integrated social sharing capabilities that increased content distribution by 40% across platforms

KOR WEB APP, Mantiqh Technologies [Link](#) 2023 — 2023

- Built the complete frontend of Keys On Rent, a rental PropTech platform with 800+ verified listings across Bangalore, Pune and Mumbai, using Next.js and Tailwind CSS
- Developed an advanced property search and filter system with support for city, area, type, price range, furnishing status, bedrooms, bathrooms, amenities, and availability
- Integrated GSAP animations for scroll-based interactions and page transitions, delivering a smooth and engaging browsing experience across listing and detail pages
- Improved page performance and organic search visibility through Next.js SSR, next/image optimisation, semantic HTML, and structured metadata for city and locality-based rental pages

THE PARTIMER, Mantiqh Technologies 2023 — 2023

- Engineered robust API communication using React Query, reducing data fetching time by 65% and server load by 40%
- Implemented global state management that decreased rendering time by 30% and improved application performance
- Developed advanced features including infinite scrolling and WebRTC-based interview recording system
- Achieved 90% test coverage using Jest, reducing bug reports by 45% post-launch

Ecocrew, Mantiqh Technologies [Link](#)

- Built the marketing website and admin panel for Ecocrew, a Bangalore-based sustainability platform that has onboarded 1,00,000+ users, completed 35,000+ orders, and facilitated collection of 10,27,843 kg of recyclables
- Developed the admin panel to manage doorstep pickup scheduling, order tracking, executive assignments, and recyclable item pricing across categories including paper, plastic, metal, and e-waste
- Implemented the eco-coins and rewards management interface in the admin panel, supporting Ecocrew's in-app eco-store where users redeem coins for eco-friendly products
- Built responsive, SEO-optimised marketing pages communicating Ecocrew's value proposition to drive app downloads and user acquisition across Bangalore
